It is old in the art to form a sheet of material about a flower pot or floral grouping and then place an elastic band around the sheet of material to hold the sheet in place about the flower pot or floral grouping. In some instances, the band has been positioned about the outer surface of the pot with the sheet of material positioned between the band and the flower pot. In some instances, the band has been positioned above the upper end of the pot thereby causing a portion of the sheet of material to be forced inwardly over the upper end of the pot.

It is also old in the art to form a sheet of material into a conically shaped

tube like member referred to commonly in the art as a sleeve. A floral grouping or flower pot with flowers therein can be disposed through the larger open end of the sleeve, wherein the sleeve covers the floral grouping or the flower pot and extends above and around the flowers in the floral grouping or flower pot.

It is also old in the art that cut flowers have been wrapped with the following materials or combinations of materials:

1. Kraft paper plus waxed or unwaxed tissue paper with the flowers being placed next to the waxed paper or tissue paper.
2. Kraft paper plus newspaper plus waxed or unwaxed tissue with the flowers being placed next to the waxed or unwaxed tissue. These three materials have been used to wrap flowers in various combinations such as Kraft paper plus newspaper or Kraft paper plus waxed or unwaxed tissue paper or newspaper plus waxed or unwaxed tissue paper.
3. Waxed or unwaxed tissue paper, polymer films and Kraft paper (treated for water resistance or wet strength or untreated).
4. Polymer film and waxed tissue paper.
